 Crystal Technologies Ltd.  Crystal Technologies

 KMA Centre, 7th Floor, Upperhill Nairobi

ABOUT US

Established in 2012, Crystal Technologies is a leading provider of comprehensive **end-to-end ICT solutions** throughout the East African region. With cybersecurity as our core expertise, we enable institutions to build resilient digital infrastructures that can withstand today's most complex and evolving threats.

We partner with Kenya's leading market players, equipping them with the strategic tools and services needed to **proactively anticipate, detect, and respond to cyber threats**. We are committed to securing your operations and ensuring your business is prepared for any challenge.

VISION

To be the leading cybersecurity partner in Africa, enabling businesses to thrive by delivering world-class protection against cyber threats.

MISION

To empower our clients with cutting-edge, customized cybersecurity solutions that enables them to proactively anticipate, detect, and respond to evolving threats, ensuring the safety, resilience, and continuity of their business operations.

CORE VALUES

EXCELLENCE

We are committed to delivering the highest quality solutions and services.

INNOVATION

We leverage the latest technologies to stay ahead of emerging threats.

INTEGRITY

We uphold transparency, trust, and ethical practices in all our engagements.

CUSTOMER - CENTRIC

We prioritize our clients' needs, tailoring solutions to their unique challenges.

RESILIENCE:

We empower businesses to recover quickly and effectively from cyber incidents.

OUR SERVICES

Cybersecurity Services

We help organizations safeguard their digital environments by protecting critical systems, data, and infrastructure from ever-evolving cyber threats.

Unified Communication Services

We empower businesses with **integrated communication solutions** that connect people, teams, and customers seamlessly across multiple channels.

Network Services

We **design, implement, and manage** robust networks that ensure **secure, reliable, and scalable** connectivity for modern enterprises.

CYBERSECURITY SERVICES

Endpoint Security – Protects desktops, laptops, and mobile devices from malware, ransomware, and unauthorized access.

Perimeter Security – Shields your network edge with next-generation firewalls, intrusion detection, and intrusion prevention systems.

Endpoint Detection & Response (EDR) – Provides advanced threat detection, investigation, and automated response to minimize breaches.

Storage & Cloud Security – Safeguards sensitive data stored on-premises or in the cloud with encryption and continuous monitoring.

Email Security – Prevents phishing, spam, and email-borne threats to keep communication channels safe.

Dark Web Monitoring & Authentication – Tracks stolen credentials on the dark web and enhances user identity protection with strong authentication.

Managed Backup & Disaster Recovery Services – Ensures business continuity through automated backups, rapid recovery, and resilience against data loss.

Cyber Awareness Training – Equips staff with knowledge to recognize and prevent cyber threats through engaging training programs.

Managed Cybersecurity Services – Provides 24/7 monitoring, proactive defense, and incident response for comprehensive cyber protection.

UNIFIED COMMUNICATION SERVICES

IP Telephony – Delivers cost-effective, secure, and scalable voice-over-IP (VoIP) solutions for businesses.

Contact Center – Enhances customer experience through intelligent call routing, reporting, and omnichannel engagement.

Video Conferencing – Enables secure, high-definition video meetings for collaboration across distributed teams.

Mobility – Keeps teams connected with mobile-enabled communication platforms accessible anytime, anywhere.

Managed Unified Communications – Comprehensive, cloud-based communication platform offering telephony, chat, video, and call center solutions.

NETWORK SERVICES

Structured Cabling – Professional installation of cabling infrastructure to support reliable network performance.

CCTV Cameras Installation – High-quality surveillance systems for security monitoring and deterrence.

Video Surveillance & Analytics – Intelligent monitoring with video analytics for smarter security and incident response.

Biometrics & Access Control – Secure entry management with fingerprint, facial recognition, and card-based access systems.

Storage Solutions – Centralized, secure, and scalable storage infrastructure for business data.

SD-WAN, LAN, WLAN – Modern, high-performance connectivity solutions for flexible and resilient networking.

Network as a Service (NaaS) – Subscription-based model delivering enterprise-grade networking without high upfront costs.
